

Vertiv Equipment Protection Plan

(USA and Canada)

Not A Product Warranty

The Vertiv Equipment Protection Plan (“Plan”) is not a product warranty. Please refer to the applicable Vertiv Limited Warranty for information about the warranty of your Vertiv product. This Plan and its terms and conditions do not affect the terms of the applicable product warranty. The Plan applies in the 50 US states and Canada for the Vertiv™ UPS models covered under this Plan, as specified below.

Limited Guarantee

This Plan only applies to the registered End-User (“End-User”) of the UPS covered under this Plan and cannot be assigned, sold, or otherwise transferred.

What This Plan Covers

During the **Warranty period of your Vertiv UPS**, and provided the conditions of this Plan are met, at Vertiv’s sole discretion, Vertiv will replace and either (a) repair (or pay for the repair thereof) or (b) reimburse End User for the fair market value* of the equipment (in an amount not to exceed the dollar limits stated below) that was damaged by AC (120V) powerline surges or transients while it was directly and properly connected (“Connected Equipment”) to a Vertiv Uninterruptible Power Supply (UPS) covered by this Plan, if Vertiv determines that the damage was caused by the failure of the UPS product to protect against powerline surges or transients.

*The fair market value of the Connected Equipment will be determined by a third-party fair market value index selected by Vertiv or by our insurance provider.

Vertiv reserves the right to evaluate and determine whether the damage to the Connected Equipment is due to a Vertiv product failure by requesting that any damaged equipment be sent to Vertiv for analysis.

This Plan is in excess of and only applies beyond any coverage for the Connected Equipment provided by other sources, including, but not limited to, any manufacturer’s warranty and any extended warranty coverage. This Plan applies to the UPS models specified below if the power in to the equipment it is protecting is using only Vertiv products, with a current warranty, to protect against power line transients. The coverage of the UPS models specified below will then be covered by this Plan.

Vertiv reserves the right to require End User to transfer title and deliver the Connected Equipment to Vertiv if it chooses to reimburse End User for the fair market value of the Connected Equipment.
