# Vertiv<sup>™</sup> Cybex<sup>™</sup> Secure DPH Switch

Superior Security and Control at the Desktop

Designed for Common Criteria Protection Profile for Peripheral Sharing Device v.4.0 and EAL4+

### Overview

Vertiv<sup>™</sup> Cybex<sup>™</sup> secure DPH switches are field-proven, secure KVM switching solutions with special support for government agencies and security conscientious organizations.

#### Features

- Designed for Common Criteria Protection Profile for Peripheral Sharing Device (PSD) v.4.0
- Universal video connectors -Supports either HDMI or DP on the same physical video input and output ports (DVI-D supported with HDMI-to-DVI-D cable)
- Unidirectional data flow of keyboard, mouse, video, and audio
- Isolated switch ports provide discrete processing paths to each computer
- Native video supports up to UHD 4K at 60 Hz
- Cursor Navigation Switching (CNS) seamlessly transitions keyboard and mouse control between computers when pressing the left CTRL key and moving the cursor across screen borders
- Touch screen support
- Smart-card (CAC) or biometric readers for authentication on any attached computer\*
- Eliminate the need for multiple hardware resources, such as monitors, keyboards, mice, and cables
- Ease of setup and use
- Button LED colors can be customized for enhanced channel identification
- Always-on active anti-tampering system, and heavy-duty tamperresistant enclosure with holographic tamper evident seals.

#### **How It Works**

The Vertiv<sup>™</sup> Cybex<sup>™</sup> Secure Desktop KVM is ideal for environments where monitoring and managing of multiple computers, covering various degrees of secure data is required. Through Cursor Navigation Switching (CNS), users have the flexibility to manage and monitor their data by simply pressing the left CTRL key and moving their mouse across window borders.

#### Security

Designed for the latest Protection Profile for Peripheral Sharing Devices version 4.0, users are receiving the most up to date technology in a secure KVM.

The Cybex Secure Desktop KVM switch meets or exceeds these requirements with the following capabilities:

- Unidirectional Optical Data Diodes Data can only flow in one direction
- Protected Video Display Emulators Eliminates potential data leakage from display to computer
- Dedicated Peripheral Port (DPP) Secure connection to external USB authentication devices\*
- Active Intrusion Detection and Tamper-Evident Labels Ensures hardware has not been compromised

#### Flexibility

The Vertiv<sup>™</sup> Cybex<sup>™</sup> Desktop KVM switch provides users flexibility when it comes to video connection and switch control.

- Universal Video Port Supports DP, HDMI, or DVI-D connections
- Freeze DPP Channel Independently locks DPP channel to a specific computer\*
- Freeze Audio Channel Independently locks the audio channel to a computer

\* Select models

## **Benefits**

- Universal video connectors to support DP, HDMI, and DVI-D
- Block unauthorized USB devices while allowing secure switching of smart card and biometric devices between computers
- Active intrusion detection and tamper-evident holographic labels prevent hardware from being compromised
- Vertiv patented keyboard lock status indication
- Eliminates the need for multiple peripheral keyboard, mouse, and display devices
- Alleviate workspace
  clutter
- Prevents information leaks, transfer or crosstalk between adjacent ports and filters ultrasonic audio frequencies via unidirectional optical data diodes (UODD)
