

National Restaurant Chain Supports Expansion with IT-Ready Infrastructure

A Liebert® GXT Uninterruptible Power Supply (UPS) and Power Assurance Package Story

A popular restaurant chain

The Customer

Having nearly 200 locations and aggressive expansion plans, this restaurant chain needed a power protection solution to ensure business continuity in its new locations. The chain also needed to resolve an issue with UPS systems in existing locations that were improperly installed.

The Critical Need

Working with their channel partner, supported by the local Vertiv business partner, the company standardized on Liebert® GXT double-conversion UPS systems with integrated maintenance bypass and external batteries to achieve the reliability and availability needed by the growing business. In addition, the restaurant chain used the Vertiv™ Power Assurance Package for professional installation and ongoing service of IT infrastructure within each location.

The Solution

- Ensured continuous, high-quality AC power for new locations
- Remedied a previous improper UPS system installation to cost-effectively achieve a 30-minute battery runtime for all locations, giving the company sufficient time to close out checks and terminals in the event of a power outage
- Removed the burden of infrastructure installation and maintenance from in-house resources, allowing the company and its people to focus on continued growth

The Results

Many of the world's largest retailers rely on products and services from Vertiv to support their digital transformation and maintain business continuity. Vertiv enables standardized IT edge solutions for stores and distribution centers, saving companies deployment time while optimizing data center performance and simplifying overall IT management.
