

### BENEFITS

#### Power Up Quickly and Reliably

Losing power to your critical systems often has negative consequences for your business well beyond the financial impact. For data centers, you are not only losing thousands of dollars every minute, but you are likely losing customer confidence that can have long-term impact on your company's reputation and bottom line.

Getting and keeping the power you need is paramount. Perhaps you are planning a move to a new facility or have exceeded the maximum load in your current facility. Maybe you are trying to recover following a natural disaster, need more power for a special event, or require a quick maintenance turnaround without shutting down your entire data center.

Regardless the reason, Vertiv™ has a variety of equipment rental solutions for you.

Whether you need an uninterruptible power supply (UPS) or stand-alone batteries, our equipment rental program has affordable, critical power solutions to keep your business running.

#### Benefits

- Minimize downtime
- Reduce capital costs
- Streamline recovery efforts
- Capitalize on OEM expertise

### Rent the critical power equipment you need to keep vital applications online

When you need to ensure power to support critical applications, time is of the essence. And yet, you may not have the flexibility to purchase the equipment you need.

That is when renting becomes the perfect solution. You can utilize your operating expenses in flexible contract durations.

Vertiv has equipment rentals to meet virtually any power need. Choose from a broad range of power ratings when selecting a single-phase or three-phase UPS.

Even if you want to rent a battery bank during a battery maintenance or replacement service visit, we've got the equipment and support you will need.

Our highly experienced and safety-trained technicians will work to help you minimize costly downtime and ensure you have the power you need to adequately support your load.

Our rental program includes:

- Certified equipment
- Same-day equipment deployment
- System startup, maintenance, and technical support
- Shutdown and pickup

## Certified Equipment

When it comes to UPS and battery rentals, Vertiv™ offers single-phase (4 to 16 kW) and three-phase (10 to 500 kW) UPS units for a variety of needs. We even have rentals to support replacement of an entire battery bank. Larger systems are available upon request.

## Same-Day Equipment Deployment

To meet your needs, Vertiv can deploy equipment quickly, especially if your rental is needed to get you back up and running. Upon delivery, professional installation services from Vertiv give you peace of mind knowing that the rental equipment and components will be installed by highly trained technicians that are part of our network of licensed contractors. Our experts apply industry best practices while adhering to all applicable safety standards.

## System Startup, Maintenance, and Technical Support

Following installation, our startup services ensure that the rental equipment complies with design intent and that all components work together properly. This critical process helps ensure project requirements are met to your complete satisfaction.

If an emergency or preventive maintenance need would arise, Vertiv offers on-site support for our rental equipment. Non-emergent service can be scheduled anytime Monday through Friday from 8 a.m.-5 p.m. If you prefer around-the-clock coverage an upgrade to a 24x7 service contract is available.

As the original equipment manufacturer (OEM), our factory-trained service technicians know Liebert® equipment better than any other service provider. By taking advantage of our expertise and easily accessible parts, you receive the right services at the right times to meet your critical system availability needs.

## Shutdown and Pickup

Towards the end of your rental period, our professional technicians will help plan and execute the proper shutdown of the rental units, ensuring maximum uptime for your data center. We then arrange for equipment pickup to finalize this hassle-free process.

## Summary

Equipment rental is an ideal solution for many short-term critical power requirements. And when it comes to business continuity, you don't want to take chances with your rental equipment or its service.

By working with the OEM, you have access to both product and service expertise. You can rest assured that every piece of rental equipment will have the latest hardware and firmware updates and that it has been tested to manufacturer specifications. Additionally, in the unlikely event your system requires emergency maintenance, it's covered.

From same-day equipment deployment to shutdown and pickup, our rental program gives you everything you need to satisfy temporary power needs.
