

Vertiv™ Frame Rack 4-Post

Effortless rack for server applications

Highlights

The Vertiv™ Frame Rack 4-Post delivers the strength and flexibility needed to support today's growing IT and network infrastructure. Built for heavier equipment and high-density installations, it combines the open accessibility of a frame rack with the stability and load capacity of a cabinet. Adjustable mounting rails and a sturdy steel structure provide lasting durability, while open sides allow excellent cable access and airflow. Engineered for versatility, the 4-Post Rack offers a dependable solution for servers, storage systems, and complex network deployments.

Typical applications

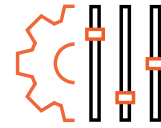

Engineered for professional IT deployments that demand reliable support and flexible layouts.

Ideal for:

- Server racks in edge or network closet deployments
- Storage and backup systems
- Network core or aggregation racks requiring front + rear mounting
- Edge infrastructure deployments requiring an open frame but heavier load capacity

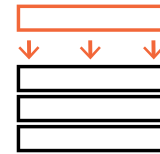

Vertiv™ Frame Rack 4-Post

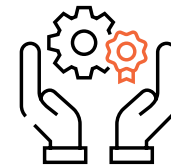

Adaptable depth & configuration

Multiple depth options allow alignment with equipment size, cable routing and airflow needs.

Robust structural support

four-post frame keeps heavy equipment stable, up to 2000 lbs when rack is bolted to floor

Standard mounting support

equipped with #12-24 or M6 uprights and RMU markings for standard 19-inch rack gear.
