

Vertiv™ CoolPhase Condensing Unit

Unpacking Instructions for 15 kW models.

The following tools/equipment are required to unpack Vertiv™ CoolPhase Condensing Unit:

- Safety boots.
- Gloves to avoid splinters when the panels are being handled.
- Fork lift or Pallet Jack to move unit closer to its final location.

Follow this instructions to unpack the Unit:

1. Place the package on a flat surface, then trim the polystraps to release the unit.
2. Remove the protector corners and the honeycomb, then take off the user manual from the top.
3. Step aside the cardboard and the corrugated packaging material that protects the unit on the front of the package.
4. Remove the foam pads on the base of the unit to access the anchoring base brackets.
5. Lastly, detach the lifting brackets from the pallet by removing the 3 screws attached to them, then proceed to detach the condenser from the pallet as established in the Handling Instructions document.
