

# Distribution Assurance Package

Deployment, Startup and Lifecycle Management

## Benefits

### Single-Source Management for Vertiv™ Rack PDUs

Rack power distribution units (PDUs) are the last link in the power chain, ensuring delivery of critical power to IT loads. These critical components play a key role in data center infrastructure management, giving you access to rack-level power consumption and environmental information. Rack PDUs also allow you to directly control power to IT equipment for better capacity and power management.

Having rack PDUs that are properly installed and maintained is essential for critical system availability. However, your internal resources who are dealing with time and budget restraints cannot always give rack PDUs the attention they need. Additionally, services that aren't provided by the original equipment manufacturer (OEM) may not be comprehensive or include the level of expertise required.

By choosing a set of solutions that combines market-leading rack PDU technology with lifecycle services provided by the OEM, you simplify the management of your IT equipment.

### Benefits

- Assured critical power delivery
- Optimized use of your IT staff
- Simplified rack PDU deployment and maintenance
- Instant access to power protection information
- Improved protection for your IT investment

## Ensure power system availability with expert support for Vertiv™ Geist™ rPDU

The Distribution Assurance Package combines market-leading rack PDU technology with up to ten years' protection plan and the industry's premier service capability.

With this solution, you are helping to ensure data center availability. You are putting your critical power in the capable hands of our experienced team of factory-authorized technicians from day one, giving you peace of mind. While rack PDUs offer trouble-free operation, rapid deployment and ongoing oversight are essential to business-critical continuity.

Our Distribution Assurance Package for Vertiv Geist rPDU includes:

- Optional startup and rack-mount installation
- Up to ten years' protection plan
- Optional removal and disposal
- Emergency response

## Optional Startup and Rack-Mount Installation

Factory-authorized Vertiv technicians handle rack-mount PDU installation and startup at your location. You'll enjoy the convenience and relief that come from having the experts do the job, and IT staff is free to attend to other tasks

## Protection Plan

The Distribution Assurance Package provides 100 percent parts coverage for replacement for up to ten years. With this level of protection, you avoid unexpected downtime costs and gain network availability.

## Optional Removal

If ordered with the Distribution Assurance Package, our technicians will remove old rack PDUs. This optional task is handled when visiting to rack-mount and startup your new rack PDUs.

## Emergency Response

Vertiv's experienced team of technicians offers the industry's premier service capability for supporting all Vertiv rack PDUs. Should a problem ever arise with the units, you'll have 24x7 access to Vertiv's Customer Resolution Center. You can count on quick recognition by support personnel as well as priority status during emergencies including guaranteed emergency response.

## Summary

Even when your IT staff is working at capacity, there's no need to leave business-critical power unmanaged.

The Distribution Assurance Package from Vertiv Services gives you a trusted OEM service partner with an unmatched level of rack PDU service expertise. We'll be at your side from order to deployment, and ensure consistent service across all your sites. You'll have a complete, worry-free solution to assure critical power to your IT loads for maximum availability.

By combining leading rack PDU technology, expert service and support, and a protection plan lasting up to ten years, you'll know your data center has the power it needs to support business-critical applications.
