Vertiv™ Environet™ Alert

Release Notes

VERSION 1.3, JULY 2021

Release Notes Section Outline

1. Features and Bug Fixes
2. Supported Software Information
3. Technical Support Information

1. Features and Bug Fixes

This version of Vertiv™ Environet™ Alert focuses on new features, including the addition of support for BACnet IP devices (direct communication to the server), basic tenant management and alarm class customization. This release also includes other bug fixes, enhancements and performance improvements; for simplicity and clarity, not all minor tasks (with reference numbers) have been included in the release notes.

Version 1.3 Features

REFERENCE NUMBER	DESCRIPTION
US352	Asset Management - Allow blade server enclosures
US390	Tenant management feature add
US401	Alarm class customization – add, edit, delete
US404	BACNet IP - Support BACnet IP protocol
US415	Active Directory / LDAP support
US420	Device Template View - Template Meta-data
