

Customer spotlight: DigitalGlue

Customer Need

DigitalGlue (a Vertiv reseller and systems integrator), on behalf of a Hollywood production studio, sought equipment that supported today's video resolution quality while establishing a path for eventual migration to 4K broadcasting. To reduce disruption and save time and money, the studio specifically required a solution that would be compatible with the facility's existing CAT 6/7 ethernet cables and network switches

Solution

Avocent® HMX 5000 Series IP-based KVM Switch

Benefit

- Zero-configuration networking simplified implementation by automatically obtaining the media access control (MAC) address of devices as they are attached to the network
- Switch times were reduced to less than a second greatly improving workflow
- Customizable hotkeys led to an enhanced user experience
- Productivity improved with the ability to access two different computing resources from one dual-monitor edit station
- USB extenders enabled the integration needed to perform color correction sessions
- The quality of the digital video at the workstation was improved
- System scalability supported growth by enabling hundreds of users to securely connect in real time with multiple servers and workstations

The Avocent HMX 5000/6000 KVM is highly scalable and configurable, which makes it so easy to connect multiple users to multiple servers and workstations. It's really an ideal solution for a large Hollywood studio.
