Your critical infrastructure works
24/7
When was the last time a certified
specialist reviewed it?

Today we place a certified Vertiv engineer at your site to diagnose your infrastructure and deliver a concrete action plan — at no initial cost and with no friction.

The goal is clear: **identify risks before they turn into downtime.**

Access through this program:

- Direct manufacturer support.
- Certified field engineers in Latin America.
- Personalized data-driven approach.
- Proven track record in critical infrastructure.
- Comprehensive portfolio: UPS, thermal solutions, and IT infrastructure tailored to your industry.

Vertiv combines deep technical expertise with a customer-centric approach to help you maximize the value and performance of every asset in your infrastructure.

Three key benefits Vertiv™ Services supports you with:

Free technical visit

No commitment. We identify hidden problems that cost thousands of dollars in downtime.

Personalized diagnosis

We identify the current condition of your installation: configuration, useful life, energy efficiency, and latent risks.

Action roadmap

Receive a prioritized plan with clear, actionable steps designed for your specific infrastructure.

The three scenarios of your roadmap

Critical: Immediate action

Preventive: 90-day plan

Optimization: Improve your ROI
