

Single Phase UPS Battery Replacement

Benefits

Vertiv offers you the possibility to perform the battery replacement on your own and have your battery always perform at best.

Battery Restore

With battery restore you will be able to grant maximum power continuity to your connected loads by simply purchasing the right battery kit for your Vertiv™ Edge single-phase or Liebert® GXT UPS.

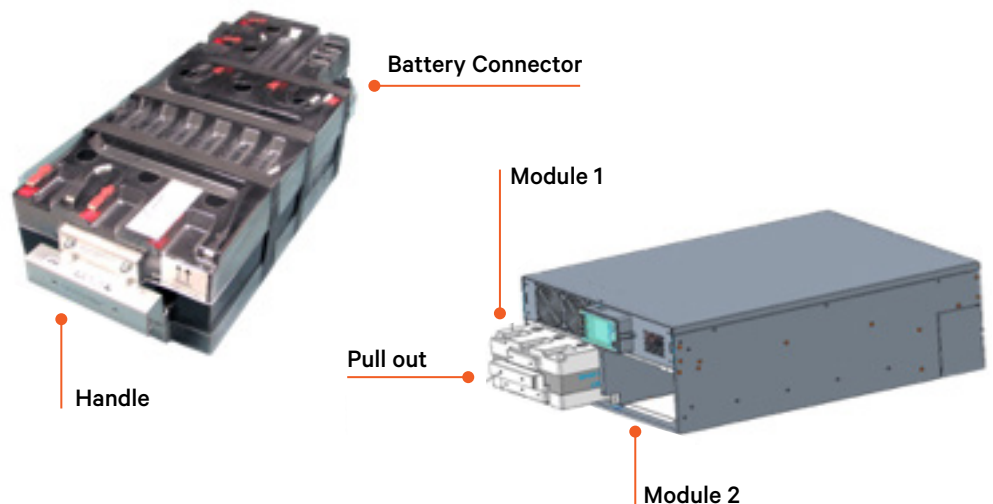

By replacing your UPS batteries, you will benefit from:

- Continuity and availability of UPS battery system
- Power continuity to critical loads
- Maximum battery runtime
- UPS optimal performance throughout its entire lifetime
- Maintaining the best performance for your business applications
- Improved power protection.

Ensure your UPS battery provides you with the required runtime, at any time.

The battery is a key element in every UPS and it is critical to grant power continuity to all connected loads, should a power outage occur. Correct UPS usage and maintenance, together with battery replacement at the right time, are essential for smooth and uninterrupted operation in every critical facility from core to edge.

We help you maintain your edge applications with the battery kit replacement options available for Vertiv Edge single-phase and Liebert GXT UPS. Following the indications in the Technical Specification Table, you can simply purchase the right replacement battery kit for your UPS and have your technicians perform the replacement.
