IN THIS ISSUE**Need More Computing Capacity Now? Try a Prefabricated Modular Data Center**

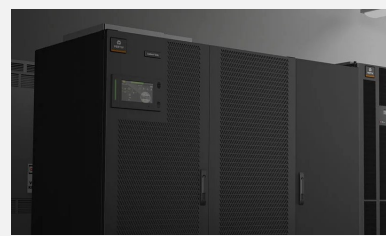

The continuous pressure for more computing capacity that can be rapidly deployed, especially at the network edge, is creating a time of unprecedented digital transformation for Vertiv customers. Pre-fabricated modular (PFM) data centers and power rooms address this need, and as a result, are fueling one of the most rapidly growing markets in data center infrastructure.

[Continue reading the article](#)**TECHTALK ONLINE WEBINAR SERIES****Telco's Hopes & Fears for 5G**

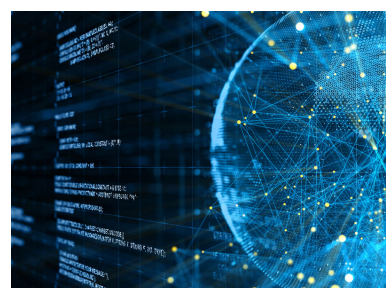

Vertiv, together with 451 Research, surveyed over 100 global telecom operators to get their insights on implementing 5G and edge computing. Join experts from Vertiv and 451 Research as we discuss the survey findings and what operators can do for a successful 5G implementation.

**23 MAY 2019 - 11AM GMT +8 | www.Vertiv.com/Asia5G**[Register for the Webinar](#)**IN THE NEWS****Vertiv and 451 Research Release New Report on 5G Preparedness and Technical Enablers**

To clearly understand the upsides and downsides of delivering 5G infrastructure, Vertiv partnered with 451 Research to get operators' insights on implementing 5G and edge computing. More than 100 telecom operator tech decision makers worldwide outlined which enabling technologies and services will most affect their 5G success over the next decade.

The Vertiv HPL lithium ion battery cabinet provides safe, reliable, and cost-effective high-power energy, with improved performance over traditional valve-regulated lead-acid systems. Equipped with Lithium-ion nickel-manganese-cobalt (NMC) batteries and Vertiv's own battery management system, Vertiv HPL provides a well-balanced, safe and powerful energy storage system with 38kWh (200kW/cabinet).
