**ECO-INSIGHTS:**  
**Customers Are Pushing Data Centers to Have a Greener Approach**

"Data centers are being driven by customers to reduce carbon footprints, consumption of energy, water, raw materials, and the amount of waste they produce," says a report from international law firm Norton Rose Fulbright.

Addressing Today's Data Center Construction Challenges with Modular Infrastructure

**DataCenter Knowledge**

Join Omdia and Vertiv in this Data Center Knowledge webcast on April 19th (or available on-demand after that date) based on Omdia's latest research. We will review the results from a survey of global decision-makers which demonstrates why prefabricated modular data center solutions have become a go-to for colocation and cloud service providers, telecommunication companies, and enterprises from every industry.

VERTIV INSIGHTS

[Develop Future-Ready Data Centers with Disruptive Technologies](#)

Global end-user spending on public cloud services is expected to exceed \$480 Billion in 2022 according to Gartner. But recent research from the analyst company also shows that retrofitting existing on-premises data centers is also key to handling evolving and emerging workloads and to giving legacy enterprise sites new or prolonged life, especially when based around emerging or disruptive technologies.
