The Modular Data Center Advantage: Leveraging Chilled Water Systems for Optimal Cooling

Chilled water systems replace air with water for cooling purposes. These solutions are also vapor compression-based but often include free-cooling functionality and achieve higher overall efficiency via more extensive, centralized components outside the whitespace.

Service Spotlight

Transformer Preventive Maintenance

Failure of large power transformers can cost you millions in lost revenue because replacements can take months to purchase and install. Fortunately, losses due to transformer failure can be avoided. Through preventive and predictive maintenance and testing, Vertiv can identify potential issues and repair problems before a unit fails.
