

An introduction to Vertiv

Architects of Continuity™

Data Centers

Communications Networks

Commercial and Industrial Facilities

Updated: May 2021

Technology underpins
and enriches almost
every aspect of our lives.

Technology drives the
global demand for data.

Vertiv provides the
products and services
infrastructure needed to
manage that data.

NYSE: VRT

© 2021 Vertiv All Rights Reserved

Data is essential to human progress and is built into the very fabric of our society. Imagine, without the transfer of data, the world just might be silent.

The transfer of data is reliant on the continuity of the vital applications inside data centers, communication networks and other critical facilities.

Vertiv helps to make it all happen.

We do this by:

Bringing together hardware, software, analytics and services.

Ensuring uninterrupted operations, optimal performance and scalability.

Doing it differently through visionary expertise, immersive collaboration, relentless agility, intelligent ecosystems and scalability.

Architects of Continuity™

Architects of

ContinuityTM

ar•chi•tect *noun*

1. Visionary builder of future-ready digital infrastructures

con•ti•nu•i•ty *noun*

1. Reliable, safe, uninterrupted operations
2. Bringing customers' current reality to future aspiration

Building future-ready digital infrastructures that deliver continuity.

 **Sales**
4.4 B

 **Employees**
~21,000

 **Customers Include**
Alibaba, Alstom, America Movil, AT&T,
China Mobile, Equinix, Ericsson,
Reliance, Siemens, Telefonica,
Tencent, Verizon, Vodafone

Manufacturing Sites: 19
Service Centers: 300+
Reach: 130+ countries

Offering

Broad range of power, thermal, and IT and edge infrastructure, solutions and services portfolio

Geography

Global, well-established footprint, and supply-chain network

End Market

Customers who operate in some of the world's most critical industries

Our focus on *data centers*

*Enabling reliability, efficiency and scalability:
Hyperscale/Cloud, Colocation, Enterprise and Edge.*

- Expertise from design through construction and commissioning derived from decades of experience
- Innovative solutions that reduce costs, improve management and speed deployment
- World-class services that drive uptime and deliver insights into performance
- Product, system and integrated solutions for: Enterprise, Colocation, Hyperscale and Edge

Our focus on *communication networks*

Provide smart, fast, flexible solutions for advanced networks and network management: Macro Site, Central Office, Small Cell and Data Center.

- Innovation-enabling flexible architectures
- Fast deployment, turnkey solutions, seamless service
- Intelligent systems for smart, holistic network management
- Future-forward solutions supporting 5G and a variety of sites including: Small Cell, Macro Site, Central Office and Data Center

Our focus on *commercial and industrial*

Delivering reliability and simplifying complexity in industrial and rugged environments: Healthcare, Manufacturing, Rail/Mass Transit, Power Generation and Oil and Gas.

- Robust protection in even the most extreme conditions
- Solutions customized to meet specific needs and budgets
- Expert technical teams who get there fast
- Products, solutions, services and expertise for: Healthcare, Rail/Mass Transit, Power Generation and Oil and Gas

Our Board of Directors

Vertiv (VRT) is a publicly traded company on the New York Stock Exchange.

Our portfolio

POWER MANAGEMENT

Description

- Small, medium and large uninterruptible power systems (UPS)
- Industrial-grade UPS
- AC power distribution systems
- 12V to 400V DC power systems
- Custom DC UPS systems along with DC battery chargers and distribution
- Rack power distribution

THERMAL MANAGEMENT

- Small thermal systems including room and row/ rack cooling
- Air handling and chiller: large systems located outside the data room that provide climate control

INTEGRATED RACK SOLUTIONS

- IT and infrastructure management solutions
- Rack PDUs
- Integrated solutions

SERVICES

- Diverse array of services to handle ongoing customer equipment and product needs
- Maintenance, project and training services
- Tailored customer offerings

VERTIV™

Award-winning leading provider of innovative power, thermal and IT infrastructure solutions and services for digital infrastructure.

- ✓ Recognized leadership across served markets, offerings and geographies
- ✓ Strong project-management capabilities differentiates Vertiv from other market participants
- ✓ Rewarded by customers for the ability to collaboratively work to provide solutions for critical needs
- ✓ At the forefront of energy efficiency applications
- ✓ Multiple awards won as independent company

The CEO Forum Group has selected Rob Johnson and Vertiv for the 2020 Transformative CEO Award in Innovation in the category of Communication Infrastructure. This is bestowed for excellence in building and protecting the critical telecommunications networks around the world and in data security and delivery of uninterrupted power. Most significantly, Vertiv's communication infrastructure has become our backbone during the COVID-19 crisis.

Electrical Review Excellence Award for Power (Noriker Power Project)

Vertiv™ Thermal Management

Vertiv capabilities

Thermal Management

A complete line of energy-efficient and reliable technology

- Perimeter, in-row and high-density cooling
- Free cooling chillers, heat rejection and economization
- Evaporative free cooling
- Custom air-handling solutions
- Small systems for edge applications, small computer rooms and network closets
- Direct liquid cooling
- Modular smart solutions to add capacity with IT growth

Controls to optimize efficiency and uptime

- Unit and supervisory controls with machine-to-machine communication and real-time monitoring
- Advanced algorithms for system auto-tuning, energy optimization, and capacity management

Vertiv capabilities

Thermal Management

PERIMETER COOLING

IN-ROW COOLING, AISLE COOLING

FREECOOLING CHILLERS

EVAPORATIVE FREE COOLING

MONITORING AND CONTROLS

Vertiv difference

Thermal Management

Unmatched efficiency and reliability for mission-critical applications

- We deliver the highest level of protection and uptime
- Industry-leading efficiency levels (Power Usage Effectiveness as low as 1.1)
- Up to 50 percent lower capital and operating costs.
- Industry-leading, award-winning technologies

Deep design and application knowledge

- We partner with each customer to develop and deploy solutions that best meet their needs
- Intelligent, self-optimizing solutions that enable customers to spend less time managing cooling and more time managing their facilities

Customer spotlight: Amdocs

Thermal Management

Customer Need

- A more economical mode of operation when external temperature is lower than the internal temperature of the facility
- Up to 50 percent energy savings
- Eco-friendly solution
- Maximizing efficiency of the data center

Solution

- Liebert® PDX with EconoPhase
- Liebert® Microchannel Condenser

Benefit

- Enhanced, flexible freecooling and low total cost of ownership (TCO)
- The most advanced refrigerant economizer
- Supreme levels of efficiency and easy installation

“Vertiv’s deep technical knowledge allowed us to make an informed risk-benefit analysis and identify the most efficient thermal management solution for our Chiswick Park data center.”

Ronnen Perry
Global Technical Manager at Amdocs

Vertiv™ Power Management

Vertiv capabilities

Power Management

Project, maintenance and performance services for data centers, communication networks and industrial markets.

Vertiv difference

Power Management

Continuous operation and optimal performance of your vital applications

- Comprehensive range of power solutions for data centers, communication networks, commercial and industrial networks
- Industry-leading safe and reliable power solutions for heavy-duty, data center and edge of network applications
- Advanced Lithium-ion battery solutions for single- and three-phase applications
- Complemented by our full software suite and global service organization

Customer spotlight: Equinix

Power Management

Customer Need

- Update and redesign the entire 4 x 800 kVA parallel UPS system based on a centralized, N+1 architecture for one of Equinix's data centers

Solution

- Implemented a new distributed redundancy model with three chains, each composed of 1 MW Liebert® Trinergy™ UPS system in a (N+1) configuration
- Vertiv™ LIFE™ Services for cutting-edge remote diagnostic and preventative monitoring service

Benefit

- Three different power lines, powering each rack with a 2(N+1) UPS configuration for utmost reliability
- AC power capacity expansion of up to roughly 500 kW, leading to an increase in rack density per square meter
- Up to 96 percent UPS efficiency

“We will make good use of the three Liebert® Trinergy™ UPS systems’ scalability by upgrading the power capacity whenever the critical load evolves. And Vertiv will enable us to do it without any service disruption for our data center customers.”

- Director of Operations, Equinix

Vertiv™ IT and Edge Infrastructure

Vertiv capabilities

IT and Edge Infrastructure

Support for Edge applications that require moving processing and storage closer to the customer.

Use Cases

Data Intensive

- Restricted Connectivity
- Smart Cities / Factories / Home and Building
- HD Content Distribution
- High-Performance Computing
- Virtual Reality

Human-Latency Sensitive

- Web Site Optimization
- Augmented Reality
- Smart Retail
- Natural Language Processing

Machine to Machine

- Smart Security
- Smart Grid
- Low-Latency Content Dist.
- Arbitrage Market
- Real-time Analytics
- Defense Force Simulation

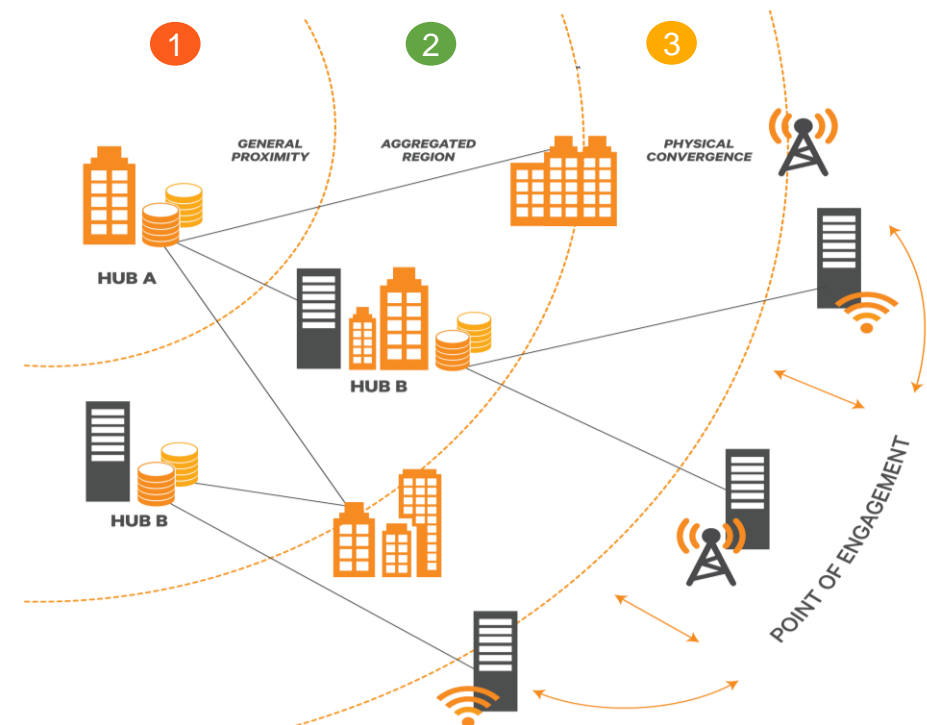

Life Critical

- Digital Health
- Connected/Autonomous Cars
- Drones
- Smart Transportation
- Autonomous Robots

Vertiv™ SmartMod™

Vertiv SmartMod is a flexible platform, optimized for simplified deployment of your critical IT assets

Vertiv™ SmartRow™ DCR

The SmartRow DCR is a self-contained, modular data center designed to simplify IT deployments in indoor spaces

Vertiv™ SmartRow™ DCX

SmartRow DCX provides a complete data center in weeks, utilizing an enclosed room-neutral system that meets today's needs while being prepared for tomorrow

Vertiv difference

IT and Edge Infrastructure

A leader in Edge infrastructure

- Easy integration of components
- Fully customizable for your IT needs
- Rapid deployment for quick installation
- Remote monitoring and management
- End-to-end service

Edge infrastructure portfolio benefits

- From racks and enclosures, to power protection and distribution, to cooling and thermal management solutions, our compact and reliable small-space infrastructure delivers the reliability you need to grow your edge network
- Pre-built, factory-integrated systems can give you the flexibility of a custom solution with the convenience of an off-the-shelf product

Customer spotlight: Property and casualty insurance provider

Edge – Data Center

Customer Need

- Improve the visibility and control of the company's distributed digital assets to effectively manage its network from the core to the edge

Solution

- Vertiv™ Environet™ data center monitoring system

Benefit

- Improved uptime
- Increased cooling efficiency
- Enhanced safety
- Better asset management
- More educated workforce

“I was able to show that where the vendor was saying he would save us \$1,000 a month, in reality, it was only savings of about \$230 a month. That kind of information is very helpful for us...when we go to purchase new hardware.”

- Technology Lead, Property and Casualty Insurance Provider

Vertiv™ IT Monitoring and Management

Vertiv capabilities

IT Systems

Data center IT infrastructure and operations

- Centralized, secure access to IT devices from any vendor over IP – in traditional enterprise data centers, co-location and remote or edge applications

Control room solutions

- Real-time access to high-resolution content across multiple workstations – in broadcast and post-production applications

Desktop productivity and security

- User access to multiple desktop computers with a single keyboard and mouse – in the office environment, test labs and locations with access to both secure and un-secure machines

Vertiv capabilities

IT Systems

**SERIAL
CONSOLE**

**CONSOLIDATED

Vertiv difference

IT Systems

The leader in IT management

- A portfolio unmatched for remote data center IT access and control for IT infrastructure and operations professionals. Our portfolio spans devices and software and is supported by cutting-edge services
- Our IT management products and services make us not only an outstanding performer in the traditional data center but our portfolio is also uniquely positioned to deliver outstanding performance in edge applications

Vertiv™ IT management customer benefits

- Improved IT operations with an ecosystem of IT Management products
- Streamlined workflows in environments using multiple workstations
- Secured access between security levels in sensitive environments
- Sourcing from a single supplier

Customer spotlight: DigitalGlue

IT Systems

Customer Need

- DigitalGlue (a Vertiv reseller and systems integrator), on behalf of a Hollywood production studio, sought equipment that supported today's video resolution quality while establishing a path for eventual migration to 4K broadcasting. To reduce disruption and save time and money, the studio specifically required a solution that would be compatible with the facility's existing CAT 6/7 ethernet cables and network switches

Solution

- Avocent® HMX 5000 Series IP-based KVM Switch

Benefit

- Zero-configuration networking simplified implementation by automatically obtaining the media access control (MAC) address of devices as they are attached to the network
- Switch times were reduced to less than a second greatly improving workflow
- Customizable hotkeys led to an enhanced user experience
- Productivity improved with the ability to access two different computing resources from one dual-monitor edit station
- USB extenders enabled the integration needed to perform color correction sessions
- The quality of the digital video at the workstation was improved
- System scalability supported growth by enabling hundreds of users to securely connect in real time with multiple servers and workstations

"The Avocent® HMX 5000/6000 KVM is highly scalable and configurable, which makes it so easy to connect multiple users to multiple servers and workstations. It's really an ideal solution for a large Hollywood studio."

- Sean Busby, DigitalGlue President

Vertiv™ Prefabricated Modular and Integrated Solutions

Vertiv capabilities

Solutions

Our customized, standard solutions offer you the ideal combination of best value and rapid delivery. Our factory-integrated solutions offer you a low-risk, high-value global solution that can be rapidly delivered and assembled on site.

Solutions

Our Methodology

Complete Critical Infrastructure Solutions and Deep Domain Knowledge

Vertiv applies ultra-modern technology and mass-production principles to enable exceptional scale, velocity, and quality for every project regardless of size or complexity.

Our Partners

Vertiv uses modular integration techniques to help our customers, contractor, and consulting partners more effectively design and build data centers.

Customer spotlight: T-Systems

Solutions

Customer Need

- Provide cloud services across Europe
- Meet customer SLAs of availability, reliability, security, scalability, transparency, efficiency and sustainability
- Quickly deploy a state-of-the-art, Tier III, twin-core data center

Solution

- A modular, containerized structure to achieve rapid availability, high scalability, streamlined expansion and staggered investment

Benefit

- Nine-month deployment time frame
- ~99.98 percent availability
- Site Power Usage Effectiveness of ~1.3
- ~30 percent reduction in power use over comparable facilities

“ (Vertiv) worked with us to deliver true expertise and industry knowledge, positioning us to provide a strong cloud platform that serves both domestic and regional customers in Europe.”

- Program Manager, T-Systems

Vertiv™ Services

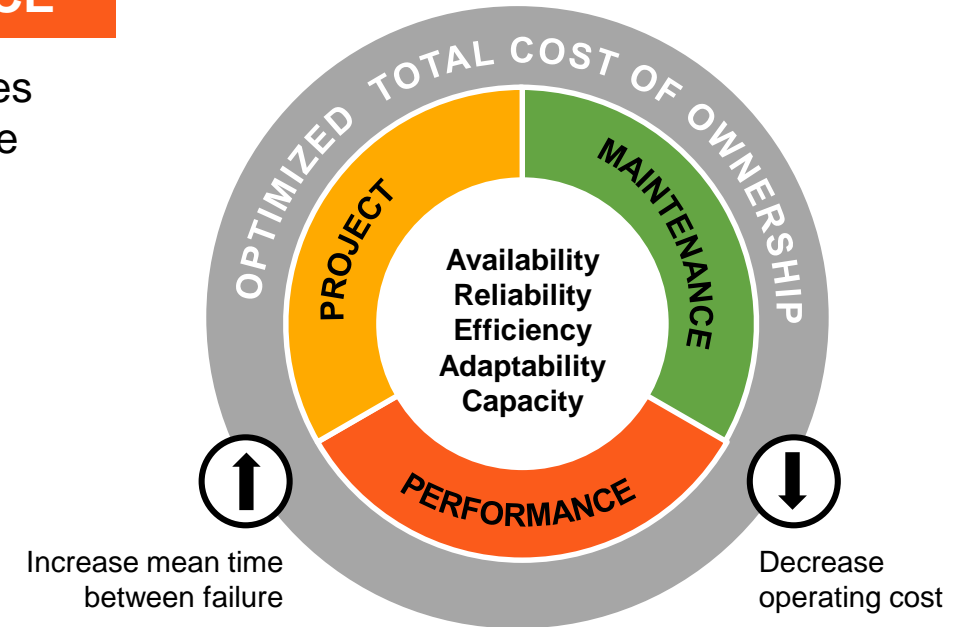

Service capabilities

Services

A complete lifecycle approach to service, from project launch to ongoing maintenance and performance optimization.

Vertiv difference

Services

Services ensure that your vital applications stay up and running. We do this through our vast array of project, maintenance and performance capabilities, supporting you in making better decisions to operate more efficiently and reduce complexity.

Customer spotlight: Pacific Seafood

Services

Customer Need

- Acquire a high-quality UPS to replace an aging unit while minimizing disruption. Provide clean, protected power to Pacific Seafood's IT operations while ensuring a path for future growth

Solution

- Liebert® EXM 40kVa, 208V three phase UPS with scalable power, reliable battery runtime and a Maintenance Bypass Cabinet
- Vertiv™ Quick Configure and Delivery Program
- Vertiv™ Services

Benefit

- Quickly ordered, delivered and installed UPS within four days, restoring IT operations
- Vertiv coordinated the installation and completed the UPS start-up ahead of schedule within a demanding timeline
- Delighted the customer who expressed their gratitude to the entire team for responding fast with an excellent, economical solution

Thanks to the Liebert® EXM, the Quick Configure and Delivery Program and a tremendous amount of teamwork, Vertiv was able to exceed our expectations and ensure our business continuity.

- Evan Wiercx, Infrastructure Services Manager at Pacific Seafood

Vertiv™ Software

Vertiv capabilities

Software

- Monitoring of the critical infrastructure that is vital to the delivery of service from IT installations and data centers
- Management of power and energy usage across the entire power infrastructure used to power the IT and facilities equipment
- Management and control of the use of expensive resources like space, power, cooling allowing the maximum use of these resources when deploying IT assets
- Remote monitoring of equipment performance with automated or manual recommendations on how to gain improved efficiency or resilience
- Enable capturing of stranded data to provide new insights into critical infrastructure operations and performance

Vertiv difference

Software

Expertise

Encapsulates our long experience in data center systems engineering and management.

- Comprehensive capability across data center inventory, power, thermal and space management
- Deep, rich connectivity across all domains covering IT and facilities equipment from all vendors
- Tightly integrated hardware and systems offerings for optimal performance and efficiency

Scale

Global software and services capabilities for all data center operating models.

- Modular software architecture that allows customers to choose the right components as needs dictate
- Installed base of over 5,000 global customers across numerous industries and geographies
- Extensive, experienced channel and business partner ecosystem to serve customers globally

Commitment

Extensive and ongoing investment in products and research to continue our leadership position in critical infrastructure management.

- Solid track record of partnering with customers to address their unique needs

Customer spotlight: Mobile network operator

Software

Customer Need

- World's largest mobile network operator in terms of active subscribers needed to move its nearly 100k sites, included core and access devices, to a more effective and efficient management
- Needed a single business partner that could help achieve efficiency and reliability targets by continuously monitoring sites distributed in many locations

Solution

- *Trellis*TM Critical Insight was deployed to over 3,000 customer sites to integrate environmental, energy, security and safety systems into one powerful management tool that reduced energy consumption, increased occupant comfort and achieved sustainable site operations

Benefit

- Monitoring was possible both on premise, from the customer headquarter and remotely by Vertiv 24x7
- Quickly began showing ROI
- Experienced 70% reduction of inaccurate alarms that lead to reduction of unnecessary visits and optimized personnel workload

*Trellis*TM Critical Insight is a powerful web-based building and site monitoring platform with software tools to manage energy conservation projects, identify key operational problems and analyze the results.
