Today, critical technologies can be located anywhere; in an office, IT network closet, lab and data center. Government services depend on these everyday. These vital systems require support solutions that can offer power, cooling, control and management capabilities.

Vertiv has a comprehensive portfolio of solutions, ready to be procured and deployed to help you meet your agency's Data Center Optimization Initiative (DCOI) and modernization needs.

Please check with us if you have any questions about other compliance regulations.
