

VERTIV™ BBE PRO SERIES

ProMBDE, 4H Broadband Edge Enclosures

KEY FEATURES

- Lift off dome for 360° access to all wirework and equipment.
- Seamless integral flood protection protects wirework from submersion.
- Integral universal mounting backboard for terminal blocks and good housekeeping.
- Removable lower front cover permits easy access to service wire and buried cable.
- Installation flexibility — pedestal may be self-supported, stake joint, pole or wall-mounted.

Description

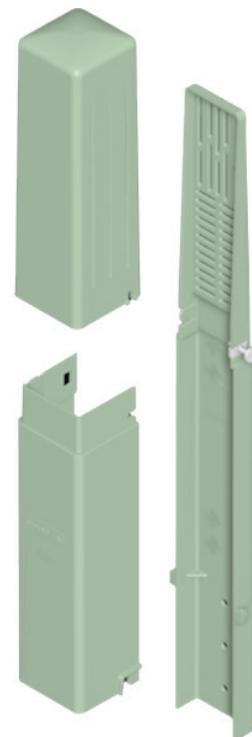

The ProMBDE and Pro4H are 4-in. square member's of the Vertiv™ BBE PRO non-metallic pedestal family.

The MBDE serves as a telephone buried wire storage enclosure and the Pro4H serves as a distribution enclosure.

Application

The ProMBDE wire storage enclosure is recommended for storing buried service wire ends until they are needed for unfinished houses. The ProMBDE will accommodate up to eight buried service wire ends that have been joined to a buried cable in a below-ground splice. It also is capable of housing small pair count terminations or one 50-ft. loop of buried service wire.

The Vertiv™ BBE PRO Series pedestals are ideal for applications where non-metallic construction, flood protection, or 360° access is desired.
