

# VERTIV™ BBE DSL SERIES

MCAD12 Broadband Edge Enclosures

## BENEFITS

- Round-cornered square-design housing maximizes space for easy installation and maintenance.
- Stainless steel screened venting provides a durable barrier to prevent insect and debris intrusion.
- Includes ground bar, ground braids and bonding clamps.
- Manufactured of heavy gauge mill-galvanized steel and treated with a unique finishing process for longer life.

Stake Mount Pedestal (MCAD12-SF)

Wall Mount Pedestal (MCAD12-MF)

## Description

The Vertiv™ BBE DSL MCAD12 pedestals are above ground galvanized steel housings that deliver maximum interior capacity and easy access to install and maintain active telecom equipment. A unique vented plastic cap assembly and louvered side vents provide excellent heat dissipation to meet the high thermal requirements of active electronics.

Two MCAD12 pedestal options are available, providing flexibility to meet individual application requirements. There is a stake mount configuration that provides 360 degree access to the upper compartment of the pedestal. A wall mount configuration ideal for multi-dwelling unit applications is also available. Both versions include the vented plastic cap assembly.

Specifically designed to accommodate hardened electronics and telecom devices, the Vertiv BBE DSL Series is a cost effective broadband solution for deploying active electronics in the OSP environment.

## Application

The Vertiv BBE DSL MCAD12 vented pedestals provide a cost effective solution to house hardened electronics that require heat dissipation for either a stake mount or wall mount application.

## Ordering Information

CATALOG NUMBER	DESCRIPTION
MCAD12-SF	Stake mount Vertiv BBE DSL Series single family pedestal, vented, beige color
MCAD12-MF	Wall mount Vertiv BBE DSL multi-family pedestal, vented, beige color

## Dimensions

	A	B	C	D	W
