Vertiv™ SmartAisle™
Containment

Energy-efficient Data Center Cooling
Vertiv™ designs, builds and services mission critical technologies that enable the vital applications for data centers, communication networks, and commercial and industrial environments. We support today's growing mobile and cloud computing markets with our portfolio of power, thermal, infrastructure management products, software and solutions, all complemented by our global service network. Bringing together global reach and local knowledge, and our decades-long heritage including brands like Chloride®, Liebert® and NetSure™, our team of experts is ready to take on your most complex challenges, creating solutions that keep your systems running—and your business moving. Together, we're building the future of a world where critical technologies always work.

YOUR VISION, OUR PASSION.
VertivCo.com
In terms of physical infrastructure the answer lies in the Vertiv SmartAisle from Vertiv. In the data-center, the SmartAisle forms the room, the power supply and the cooling system for servers, storage and the network. Choosing a comprehensive range of components that are tailored to one another in every respect enables the physical infrastructure to be adapted to any need imaginable, since no data-center is like any other and no data-center remains unchanged for long.

The Vertiv SmartAisle solution ensures optimal availability, efficiency and future-proofing.

**Features**
- Best failsafe capacity
- Ideal temperature for IT; no hot spots
- Minimum power consumption
- Easy to plan and run.

**Complete solution**
- Racks
- Rack PDUs
- Power distribution
- UPS
- Cooling with Vertiv ICOM control
- Enclosure
- Cable management
- Monitoring: cabinet and aisle
- Data Center Infrastructure Management (DCIM)
- Commissioning and maintenance
- Other services.

All active components have interfaces to a top-level infrastructure management system (Vertiv Trellis™) which facilitates integrated monitoring, management and automation of the physical infrastructure.

Achieved energy savings through patented, controlled cold aisle containment in many projects (banks, insurance companies, industry etc.).

**Green IT**

- Reduction in CO₂ emissions through optimum energy efficiency.
- Very good PUE values are achieved, often better than 1.35.
- Compliance with the EU Code of Conduct.
Vertiv™ SmartAisle™ – the comprehensive data-center solution

Control from Vertiv

Due to rising power costs and increased environmental awareness, almost every operator’s current objective is to operate their data-center as energy efficiently as possible. Many already ensure the basic separation of cold air from warm air with dummy (blanking) panels, bushings for cable entry, cold aisle containment, etc. The data-center can be further optimized by adjusting the fan speed of the recirculated air devices. This is an essential and important factor for an energy-efficient data-center. The operator can save enormous power costs by choosing the most appropriate type of regulation.

The right choice can also increase availability. The failure of a device serving to recirculate air is compensated by increasing the speed of the other devices. In terms of control, there are two main principles in use – pressure control and control via the cold aisle temperature.

With the Vertiv SmartAisle control principle, the cold aisle temperature, i.e. the temperature of the air supply to the servers, is used to control the fans which regulate the temperature in the room (see figure). This control principle is patented.

The principle of the Vertiv SmartAisle™ control
Vertiv™ SmartAisle™ containment – systematically separating cold from warm air forms the basis of an energy-efficient data-center
Vertiv™ SmartAisle™ – the comprehensive data-center solution

Overview of Vertiv SmartAisle Containments

**STANDARD**

**Standard product range:**
- Aisle width 1,200 / 1,500 and 1,800 mm
- Rack height 2,000 and 2,200 mm.

**Features:**
- Ideal for new data-centers and for retrofitting homogeneous cabinet aisles
- Industrial prefabrication makes for a highly economic solution
- Quick and easy to assemble on site.

**CUSTOMIZED**

**Features:**
- Precisely fitted to cabinets and cabinet positions
- Suitable for retrofitting non-homogenous data-centers
- Combination with Vertiv SmartAisle standard.

**FREE-STANDING**

**Features:**
- Flexible fitting to cabinets with non-standard dimensions
- For cabinets and applications that are swapped out on rotation
- Can be combined with Vertiv SmartAisle standard.

**SWITCHTUBES**

**Features:**
- No hot spots
- Adequate airflow
- Can be used in energy-efficient data-center.
The Vertiv SmartAisle™ standard product range consists of flexible, adaptable and user-friendly components.

The individual components equate the tolerances of the racks, which are not usually installed with millimeter precision. The system fits not only onto Vertiv Knürr racks but also onto most commercially available racks. The racks do not need to be installed in pairs. The top panels are transparent to allow use of the available room lighting. The standard top elements are ready for the patented Vertiv SmartAisle controller.

Different door systems are available – hinged doors and sliding doors. Hinged or swing doors are better in terms of safety and emergency exits. On the other hand, sliding doors take up less space.

**Standard product range**
- Aisle width 1,200 / 1,500 and 1,800 mm
- Rack height 2,000 and 2,200 mm.

**Features**
- Ideal for new data-centers and for retrofitting homogeneous cabinet aisles
- Industrial prefabrication makes for a highly economic solution
- Quick and easy to assemble on site.

Vertiv™ SmartAisle™ Sliding Door prepared for automatic door closers

- For cold aisle containment for aisle widths: 1,200 / 1,500 / 1,800 mm (+/- 50 mm)
- Quick and easy mounting
- Suitable for Vertiv™ Knürr® MiR® and DCM® racks and most racks of other manufacturers.

- **Clear door opening**
  Width: at least 1,050 mm
  Height: 2,080 mm.

- **Material**
  Door elements: sheet steel
  Windows: single safety glass panel
  Brush strips: polyamide (UL9 HF-1).

- **Finish**
  Final digit of order number .1:
  Powder-coated texture, RAL 7035, light gray
  Final digit of order number .8:
  Powder-coated texture, RAL 7021 dark gray.

- **Supply schedule**
  - 1 frame structure
  - 2 doors
  - 2 floor guides
  - Covers
  - Sealing material
  - Mounting material.

- **Supplied as**
  Flat-packed kit.

- **Please note**
  The required closers (electric or mechanical) should be ordered for this!

Electric Closing mechanism for Sliding Door

- Suitable for Vertiv SmartAisle sliding door
- Increases energy efficiency as doors are closed automatically
- Opens with “push & go”
- Closes with “push & go” or automatically (0 ... 30 seconds)
- Opener/closer contact for control (e.g. fire alarm system).

- **Material**
  Sheet steel

- **Finish**
  Final digit of order number .1:
  Powder-coated texture, RAL 7035, light gray
  Final digit of order number .8:
  Powder-coated texture, RAL 7021 dark gray.

- **Supply schedule**
  - 1 electric drive
  - 1 cover
  - Various mounting brackets
  - Mounting material.

- **Technical data**
  Power supply: 230 V / 50-60 Hz
  Opening speed: 0.4 m/s
  Closing speed: 0.2 m/s
  Automatic closing time setting: 0 ... 30 s
  Force: 30 N.

- **Supplied as**
  1 units.

**Mechanical Closing mechanism for Sliding Door**

- Suitable for Vertiv™ SmartAisle™ sliding door
- Increases energy efficiency as doors are closed automatically
- Retaining function for open door.

**Material**
Sheet steel.

**Finish**
- Final digit of order number .1: Powder-coated texture, RAL 7035, light gray
- Final digit of order number .8: Powder-coated texture, RAL 7021 dark gray.

**Supply schedule**
- 2 sets of gas pressure springs
- 1 cover
- Various mounting brackets
- Mounting material.

**Technical data**
- Force: 20 N.

**Supplied as**
- In units.

### Vertiv™ SmartAisle™ Sliding Door with access control

- For cold aisle containment for aisle widths: 1,200 / 1,500 / 1,800 mm (±50 mm)
- Quick and easy mounting
- Suitable for Vertiv Knürr® MIR® and Vertiv Knürr DCM® racks and most racks of other manufacturers
- Safe closing through magnets; the door can be opened manually with little effort if there is a power failure
- Access control with keypad as standard (other systems possible in the respective project)
- Button inside for normal exit
- VdS-approved emergency switch inside for in case of emergency; height of the switch is under 1 meter
- VdS-approved emergency switch outside for rescue
- Door contact switch for monitoring door open – door closed*.

**Clear door opening**
- Width: at least 1,050 mm
- Height: 2,080 mm.

**Material**
- Door elements: sheet steel
- Windows: single safety glass panel
- Brush strips: polyamide (UL94 HF-1).

**Finish**
- Final digit of order number .1: Powder-coated texture, RAL 7035, light gray
- Final digit of order number .8: Powder-coated texture, RAL 7021 dark gray.

- Flat-packed kit.
Vertiv™ SmartAisle™ Double Door with automatic door closer

- For cold aisle containment for aisle widths: 1,200 / 1,500 / 1,800 mm (+/- 50 mm)
- Quick and easy mounting
- Suitable for Vertiv™ Knürr® MIR® and Vertiv Knürr DCM® racks and most racks of other manufacturers
- Integrated automatic mechanical door closer (opening angle 180°, mounting bracket approx. 120°, from approx. 100° automatic closing).

**Clear door opening**
- Width: 1,200 mm
- Height: 2,100 mm
  - (for rack height 2,000 mm)
  - 2,300 mm
    - (for rack height 2,200 mm)

**Material**
- Door frame: aluminum
- Door elements: sheet steel
- Windows: single safety glass panel
- Brush strips: polyamide (UL94 HF-1).

**Finish**
- Final digit of order number .1: Powder-coated texture, RAL 7035, light gray
- Final digit of order number .8: Powder-coated texture, RAL 7021 dark gray.

**Supply schedule**
- 1 door frame
- 2 doors
- 3 design covers
- 2 door closers
- Mounting material.

**Supplied as**
- Flat-packed kit.

### Vertiv SmartAisle Sliding Door prepared for automatic door closers

- For cold aisle containment for aisle widths: 1,200 / 1,500 / 1,800 mm (+/- 50 mm)
- Alternative to a cold aisle door
- Quick and easy mounting
- Suitable for Vertiv Knürr MIR® and Vertiv Knürr DCM® racks and most racks of other manufacturers.

**Material**
- Sheet steel.

**Finish**
- Final digit of order number .1: Powder-coated texture, RAL 7035, light gray
- Final digit of order number .8: Powder-coated texture, RAL 7021 dark gray.

### Supply schedule
- 1 bracing bracket
- 2 to 4 panel elements
- Mounting material.

**Supplied as**
- Flat-packed kit.

Vertiv™ SmartAisle™ Roof Element

- For cold aisle containment for aisle widths: 1,200 / 1,500 / 1,800 mm (+/- 50 mm)
- Quick and easy mounting
- Suitable for Vertiv™ Knürr® MIR® and Vertiv Knürr DCM® racks and most racks of other manufacturers
- With rubber sleeves for cable routing
- Roof panel with low fire load and low smoke generation (optionally with compound safety glass)
- Roof panels can be quickly and easily removed
- Prepared for SensorBox for energy-efficient operation of the recirculated-air cooling devices and for preventing hot spots.

- **Clear aisle height**
  - Rack height 2,000 mm: 2,150 mm
  - Rack height 2,200 mm: 2,350 mm

- **Material**
  - Angular extrusion, cross brace: sheet steel
  - Roof panel: Polycarbonate, UL 94-VO/DIN 4102 B1.

- **Finish**
  - Final digit of order number .1: Powder-coated texture, RAL 7035, light gray
  - Final digit of order number .8: Powder-coated texture, RAL 7021 dark gray.

- **Supply schedule**
  - 2 angular extrusions with air regulation opening
  - 1 separator strip at W300/600/800
  - 3 separator strips at L2400
  - 1 roof panel at W300/600/800
  - 3 roof panels at L2400
  - 2 angular extrusion plates
  - Mounting material.

- **Supplied as**
  - Flat-packed kit.

- **IMPORTANT**
  - When used with Vertiv Knürr DCM® Heavy-Duty Rack, please also order suitable balancing sheet metals!

- **Please note**
  - The appropriate number of SensorBOXes to regulate the recirculating coolers should also be ordered!

Vertiv SmartAisle SensorBOX
for Vertiv SmartAisle roof element

- Suitable for air-regulation opening of the roof elements
- Conforms to a patented regulation principle for the energy-efficient operation of cooling systems
- Ready for Liebert® temperature sensor
- Can be used for different sensors.

- **Material**
  Sheet steel.

- **Finish**
  Final digit of order number .1: Powder-coated texture, RAL 7035, light gray
  Final digit of order number .8: Powder-coated texture, RAL 7021 dark gray.

Vertiv™ SmartAisle™ Filler Panel
for separating areas in the aisle without racks

- For separating areas in the aisle without racks
- Quick and easy mounting
- Height-variable; applicable for “gross” rack heights from 1,990 to 2,220 mm
- More filler panels can be mounted side by side.

**Material**
Sheet steel.

**Finish**
Final digit of order number .1:
Powder-coated texture, RAL 7035, light gray
Final digit of order number .8:
Powder-coated texture, RAL 7021 dark gray.

**Supply schedule**
1 filler panel (two-piece)
Mounting material.

**Supplied as**
Flat-packed kit.

**Vertiv™ SmartAisle™ Protector Bracket for Roof Element**

- For use on raised floors
- Can be used with high heat loads and high requirements for cooling air per rack
- For energy-efficient operation of the recirculated air devices.

**Material**
Zinc-passivated steel.

**Finish**
- Final digit of order number 1: Powder-coated texture, RAL 7035, light gray
- Final digit of order number 8: Powder-coated texture, RAL 7021 dark gray.

**Standards**
Produced in acc. with RAL-GZ 638
Load capacity according to DIN EN 12825
- on supports: deflection class 1A (2 kN) and 2C (3kN); measurement plate center
- on supports and profiles: deflection class 2A (3kN).

**Supply schedule**
1 raised floor grate.

**Technical data**
Size 598 x 598 x 40 mm (WxLxH)
Free cross-section 88%
Max. surface load 50,000 N/m² with even distribution
Max. point load (on 200 x 200 mm area) 4,500 N.

**Supplied as**
In units.

**Please note**
Suitable for raised floors with 40 mm thick panels!

---

**Vertiv SmartAisle Raised Floor Air Barrier for cable entry**

- For cable entry from the raised floor
- Sunk in to the raised floor, or can be used as superstructure
- Two-row tight brushes for pressure-resistant cold-hot separation
- For new breakouts; as superstructure for existing breakouts
- Two-piece – option to easily extend and upgrade.
- The length can be easily shortened onsite (metal saw)
- Also suitable for cabling on the rack wall (U-shape, two-piece)
- Slot-in connection – additional threaded connection.

**Dimensions**
03.028.211.9:
- External dimensions (270 mm x 220 mm)
- Usable cable entry (200 mm x 126 mm)
- Raised floor breakout (240 mm x 180 mm)
03.028.212.9:
- External dimensions (600 mm x 220 mm)
- Usable cable entry (530 mm x 126 mm)
- Raised floor breakout (570 mm x 180 mm).

**Supply schedule**
1 pair of raised floor air barriers Mounting material.

**Supplied as**
Flat-packed kit.

Vertiv™ SmartAisle™ Containment Customized

Customized – Retrofitting Solution from Vertiv

Data Centers are often the result of a structure that has developed over the course of many years. Cabinets have different dimensions and are not always positioned in a line. Knürr offers this customized solution based on a profile construction that can be made on site to accommodate the data-center precisely.

With this solution, the dimensions are recorded on site and the profiles and panels for the enclosure are cut and assembled according to your requirements. The panels are normally cut away from the data-center in a designated area. If possible, the customized elements are combined with standard components.

The standard sliding or hinged doors are generally used. The standard top element is also sometimes used as the customized elements are only used for the gaps between the cabinets.

Features

- Precisely fitted to cabinets and cabinet positions
- Suitable for retrofitting non-homogenous data-centers
- Can be combined with Vertiv SmartAisle standard

On request
Vertiv™ SmartAisle™ Containment Customized adapts to specific conditions in the data-center
Vertiv™ SmartAisle™ Containment Free-standing

Free-standing – Special Solution from Vertiv

**Free-standing**

In many data-centers, what are known as “free-standing systems” are installed in addition to the server cabinets. These cabinets are often of non-standard dimensions and are regularly swapped out in line with a defined rotation schedule (usually one to three years).

Free-standing systems may include storage cabinets, cluster applications (e.g. IBM, SUN) or server cabinets (e.g. IBM, HP, SUN etc.). There are many reasons for delivering these as a complete package including cabinets.

For storage applications, one of the main reasons is product liability. Cluster applications on the other hand are usually leased, while the reasons pertaining to server applications are often related to marketing.

The challenge with “Vertiv SmartAisle for free-standing” is to construct a flexible cold aisle enclosure that allows a fast and modular exchange of free-standing systems.

The free-standing cold aisle enclosure solution is based on Vertiv SmartAisle™ standard products and is used in combination with these elements. The panels for the free-standing solution can be customized in terms of both dimensions (height and width) according to the cabinet dimensions.

**Features**

- Flexible adjustment to cabinets with non-standard dimensions
- For racks and applications that are swapped out on rotation
- Can be combined with Vertiv SmartAisle standard
Vertiv™ SmartAisle™ Containment Free-standing for special applications in the data-center
Vertiv™ SmartAisle™ Containment SwitchTubes

SwitchTubes – Switch Cooling from Vertiv

Cooling of switches
Servers draw in cold air for cooling from the front and blow out the heated air at the back. In contrast, switches generally suck in cold air from the side and blow the air out at the side or from the back. This leads to cooling problems in racks which have a consistent separation of warm and cold air. Special air-conduction systems are needed for switch applications in order to ensure a safe, energy-efficient solution.

The Vertiv SmartAisle SwitchTube is a safe and flexible supplement to the entire SmartAisle range. Different standard products are available depending on the switch type.

Switches have special requirements.

Cooling / ventilation:
- Usually side-to-side airflow (right to left, left to right, left and right to back, ... and combinations of different directions)
- Switches suck in hot air!
- Often high cooling capacity required (up to 10 kW per switch).

Maximum supply-air temperature:
- Maximum supply-air temperature is approx. 37-40°C
- Problems in environments with energy-efficient cold / hot air separation
- Increased energy demand for cooling.

Cabling:
- Large number of cables
- The fan unit is not blocked by cables, which enables repairs to be carried out during operation
- Airflow should not be obstructed by cables.

Mechanics:
- Different heights (1U to approx. 24U)
- Different depths with different intake areas

Vertiv offers a wide range of SwitchTubes for the most common switches on the market.

Features
- No hot spots
- Adequate airflow
- Allows use in energy-efficient data center.

SwitchTubes – Controlled Cooling for Switches

Servers are usually cooled from front to back. This fits into the concept of a modern, energy-efficient data-center. However, the cooling direction of switches is mostly side-to-side. In this application, switches tend to suck in cold air from a warm area.

The SwitchTube enables the switch to receive air from the cold aisle, while hot air is guided into the hot aisle.
Airflow in SwitchRack for switches with side-to-side cooling
Vertiv™ SmartAisle™ Containment Switch Tubes

*For applications with and without raised floors*
*Applicable to switches with side-to-side cooling for energy-efficient cooling*
*Air inlet from the cold aisle (ideally with containment)*
*Suitable for Vertiv Knürr MIR® and Vertiv Knürr DCM® rack; rack width 800 mm*
*Requires 3 or 6U of the 19” installation space*
*Applicable to different switch heights*
*Height variable installation in the rack possible*
*INFO: cold-warm separation necessary in rack.*

**Material**
Tube: sheet steel
Sealing foam: PUR-Ether UL94 HF-1.

**Finish**
Final digit of order number .3: Powder-coated texture, RAL 7035, light gray
Final digit of order number .8: Powder-coated texture, RAL 7021 dark gray.

**Supply schedule**
2 intake drawers (for type 12-21U)
1 intake drawer (for type 7-12U / 4-6U)
1 height-adjustable air tube
Sealing foam
Mounting material.

**Supplied as**
Flat-packed kit.

**IMPORTANT**
Suitable for cooling a maximum of 5 kW heat load (at $\Delta T = 13$ K) per SwitchTube.

**IMPORTANT**
If there are many switches installed in the rack, one part of the front inlet perforated section is covered (since they are often very close to the front behind the front 19” extrusions).

**IMPORTANT**
May not be suitable for switches with different cooling directions.

**Please note**
Additional installations may be difficult due to existing cabling and accessory components.

- Base Vertiv Knürr® DCM® rack
- Rack width of 1,000 mm according to the CISCO specification for adequate cold air
- Avoids hot spots (recirculation of air)
- Front area depth of 200 mm for orderly cabling
- Panels for separating cold and warm air for an energy-efficient operation
- Cold air intake from the cold aisle.

**Material / finish**
Basic frame: extruded aluminium, polished
Corner piece: die-cast aluminium, polished
Doors: sheet steel, powder-coated texture
Covers: zinc-passivated sheet steel, powder-coated texture
Foam: PUR-Ether UL94 HF-1.

**Color**
Final digit of order number .1: Visible surface of covers
RAL 7035 light gray
Final digit of order number .8: Visible surface of covers
RAL 7021 dark gray.

**Supply schedule**
1 basic frame
4 19” server extrusions, sheet steel incl. U marking
2 side panels with quick-release fasteners
1 top cover with cable entry (three-piece sliding plates, can also be opened completely)
1 front door, double, perforated, sheet steel, with handle and mounting for cylinder lock
1 rear door, double, perforated, sheet steel, with handle and mounting for cylinder lock
1 complete air separation (on the left: cover with 3x 2U 19” cutouts, right side with air tube)
4 leveling feet
1 complete earthing set (VDE 0100).

**Supplied as**
Assembled.

**Please note**
Mounting adapters for 19” server extrusion should also be ordered for mounting Knürr accessories (01.147.640.9).

**Vertiv™ SmartAisle™ SwitchTube Raised Floor**

for cooling a core switch from a raised floor

- Suitable for switches with side-to-side cooling for energy-efficient cooling
- Air inlet from the raised floor
- Suitable for Knürr Vertiv Knürr® MIR® rack; rack width 800 mm (NOT for DCM® rack)
- Suitable for different switch heights
- Height-variable assembly possible in the rack; tool-free blanking panels to cover the areas outside switches
- Base area tube: 420 cm²
- Cut-out in the raised floor (min./max.): 355/410 x 127/162 mm
- INFO: cold-warm separation necessary in rack
- INFO: for max. switch intake depth of 460 mm (distance from the 19" area)
- Suitable e.g. for CISCO Catalyst 6509(-E), Catalyst 6513, Catalyst 6506(-E), MDS 9509 Director, HP ProCurve 8212.

- **Material / finish**
  - Tube: sheet steel
  - Sealing foam: PUR-Ether UL94 HF-1.

- **Finish**
  - Final digit of order number .1: Powder-coated texture, RAL 7035, light gray
  - Final digit of order number .8: Powder-coated texture, RAL 7021 dark gray.

- **Supply schedule**
  - 1 tube with blanking panels (1U, 3U)
  - 1 bottom plate
  - Sealing material
  - Mounting material.

- **Supplied as**
  - Flat-packed kit.

- **IMPORTANT**
  - Suitable for cooling a maximum 5 kW heat load (at $\Delta T = 13$ K) per SwitchTube.

- **IMPORTANT**
  - The tube covers one part of the front inlet perforation section when many switches are installed in the rack (as they are often close to the front behind the front 19" extrusions).

- **IMPORTANT**
  - May not be suitable for switches with different cooling directions.

- **IMPORTANT**
  - The highest 3U in the rack cannot be used for cooling.

- **Please note**
  - Additional installations may be difficult due to existing cabling and accessory components.
