

The *Trellis*[™] Real-Time Infrastructure Optimization Platform

Getting Started Guide

The *Trellis*[™] real-time infrastructure optimization platform is a total Data Center Infrastructure Management (DCIM) solution that reduces the complexity and operating costs of your data center. Version 5.1 provides a fresh new user interface (UI) that is fast, intuitive and focused on simplifying the tasks necessary to efficiently manage your data center.

For demonstration videos of version 5.1 platform features, including details on navigating the UI, visit the <https://tinyurl.com/Trellis-Help>.

Additional accompanying user documentation, including pre-installation and administrator guides, are available on the product page at <https://www.vertiv.com>.
