OUT OF BAND MANAGEMENT CISCO ISR 2900 REPLACEMENT

Vertiv Avocent® ACS 800 & 8000

OVERVIEW

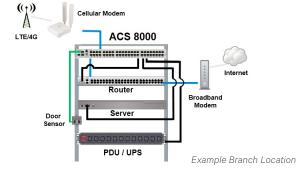

Avocent ACS 800 & 8000 series

Flexible and Scalable, from Edge to Enterprise!

- Seamless Integration with Liebert & 3rd Party UPS & PDUs
- Low-Hassle cabling with software configurable & auto-detect pinouts
- Deploy and secure in an Vertiv SmartCabinet™
- Automatic cellular Network Failover (OOB) with Cradlepoint
- Centralized management via DSView software (optional)

IT administrators have relied on the **Cisco 2900** or other ISR router for many years. However, this solution has reached EOL. The Avocent ACS series of high-density terminal servers from Vertiv can easily be substituted into new or existing data centers as well as being easily deployed at remote/edge locations, supporting port densities from 2 to 48.

	CISCO ISR4321/4331/4351	ACS800 EDGE	ACS8000 ENTERPRISE
