General Safety Information and Instructions

- For use in dry, oil free, indoor environments only.

WARNING: *The power adaptor contains live parts.*

- No user-serviceable parts are contained within the power adaptor. Do not dismantle or attempt to service the modules yourself.
- Plug the power adaptor into an earthed socket outlet close to the module that it is powering.
- Replace a defective power adaptor with a manufacturer-approved type only. See the Quick Installation Guide and/or product specification.
- Do not use the power adaptor if the power adaptor case becomes damaged, cracked or broken, or if you suspect that it is not operating properly.
- Do not attempt to service the unit yourself.
- Not suitable for use in hazardous or explosive environments or next to highly flammable materials.
- If you use a power extension cord with the units, make sure the total ampere rating of the devices plugged into the extension cord does not exceed the cord's ampere rating. Also, make sure that the total ampere rating of all the devices plugged into the wall outlet does not exceed the wall outlet's ampere rating.
- The power adaptor can get warm in operation; do not situate it in an enclosed space without any ventilation.

VERTIV™ AVOCENT® LONGVIEW™ HIGH PERFORMANCE KVM EXTENDER SYSTEM ONLY

Safety Information and Instructions

- Do not use this product to link between buildings.
- Ensure that all twisted pair interconnect cables are installed in compliance with all applicable wiring regulations.
- Do not connect CATx link interfaces (RJ45 style connectors) to any other equipment, particularly network or telecommunications equipment.
- The units do not provide ground isolation and should not be used for any applications that require ground isolation or galvanic isolation.

Radio Frequency Energy

A Category 5 (or higher) twisted-pair cable must be used to connect the units in order to maintain compliance with radio frequency energy emission regulations and ensure a suitably high level of immunity to electromagnetic disturbances. All other interface cables used with this equipment must be shielded in order to maintain compliance with radio frequency energy emission regulations and ensure a suitably high level of immunity to electromagnetic disturbances.

FCC Compliance Statement (United States)

This equipment generates, uses and can radiate radio frequency energy and if not installed and used properly, that is, in strict accordance with the manufacturer's instructions, may cause interference to radio communications. It has been tested and found to comply with the limits for a class A computing device in accordance with the specifications in Subpart J of part 15 of FCC rules, which are designed to provide reasonable protection against such interference when the equipment is operated in a commercial environment. Operation of this equipment in a residential area may cause interference, in which case the user at his own expense will be required to take whatever measures may be necessary to correct the interference. Changes or modifications not expressly approved by the manufacturer could void the user's authority to operate the equipment.

SAFETY AND REGULATORY STATEMENTS

For more information on these products, visit www.VertivCo.com to download the user manuals.

Canadian Department of Communications RFI statement

This equipment does not exceed the class A limits for radio noise emissions from digital apparatus set out in the radio interference regulations of the Canadian Department of Communications.

Le présent appareil numérique n'émet pas de bruits radioélectriques dépassant les limites applicables aux appareils numériques de la classe A prescrites dans le règlement sur le brouillage radioélectriques publié par le ministère des Communications du Canada.

European EMC directive 2004/108/EC

This equipment has been tested and found to comply with the limits for a class A computing device in accordance with the specifications in the European standard EN55022. These limits are designed to provide reasonable protection against harmful interference. This equipment generates, uses and can radiate radio frequency energy and if not installed and used in accordance with the instructions may cause harmful interference to radio or television reception. However, there is no guarantee that harmful interference will not occur in a particular installation. If this equipment does cause interference to radio or television reception, which can be determined by turning the equipment on and off, the user is encouraged to correct the interference with one or more of the following measures: (a) Reorient or relocate the receiving antenna, (b) increase the separation between the equipment and the receiver, (c) connect the equipment to an outlet on a circuit different from that to which the receiver is connected or (d) consult the supplier or an experienced radio/TV technician for help.

Rack Mounting Safety Considerations

If mounting this product in an equipment rack, the following considerations shall apply for safe installation and use of this product:

- **Elevated Ambient Temperature:** If installed in a closed rack assembly, the operation temperature of the rack environment may be greater than room ambient temperature. Use care not to exceed the rated maximum operating temperature for this product.
- **Reduced Air Flow:** Installation of the equipment in a rack should be such that the amount of airflow required for safe operation of the equipment is not compromised.
- **Mechanical Loading:** Mounting of the equipment in the rack should be such that a hazardous condition is not achieved due to uneven mechanical loading.
- **Circuit Overloading:** Consideration should be given to the connection of the equipment to the supply circuit and the effect that overloading of circuits might have on overcurrent protection and supply wiring. Consider equipment nameplate ratings for maximum current.
- **Reliable Earthing:** Reliable earthing of rack-mounted equipment should be maintained. Pay particular attention to supply connections other than direct connections to the branch circuit (for example, use of power strips).

VERTIV™ AVOCENT® HMX HIGH PERFORMANCE KVM EXTENDER SYSTEM ONLY

IMPORTANT - Allow space for airflow

EXTENDERS ONLY - The extenders and their power supplies generate heat when in operation and will become warm to the touch. Do not place them in locations where air cannot circulate to cool the equipment. When mounting units within a rack chassis, allow a 1/3 U space (1.5 cm) between rows of devices.

NOTE: Do not operate the equipment in ambient temperatures exceeding 400°C. Do not place the products in contact with equipment whose surface temperature exceeds 400°C.

VERTIV™ AVOCENT® HMX ADVANCED MANAGER SOFTWARE SERVER ONLY

LITHIUM BATTERY

CAUTION: *This product contains a lithium battery which must be disposed of in the correct manner. Risk of explosion if the battery is replaced by an incorrect type of battery:*

- If the lithium battery needs to be changed, you must return the product to your nearest Avocent dealer. The battery must be replaced by an authorized Avocent dealer.
- Once the product has come to the end of its useful life, the lithium battery must be removed as part of the decommissioning process and recycled in strict accordance with the regulations stipulated by your local authority. Advice on battery removal can be provided on request by Avocent.
